

## **BUG REPORT on additional features of Niphtio web application (Issuing Date:29<sup>th</sup>August 2003)**

**ID001:** “Add/Search icons” instead of “Save pages in the application”

### **Description**

Sub-title “Save pages in the application” and its title “Saving web pages” appear synonymous in the Guides list.

### **Steps to Reproduce**

1. Navigate to <https://www.nipht.io/guides/using-the-extensions-2023>.
2. Check the Guides list items.
3. Click on “Save pages in the application” under the title “Saving web pages”.

### **Expected Results**

Gives the reader an easy understanding on how to use the Add button and/or the Search bar to add URLs or save pages to their Niphtio app.

### **Environment**

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

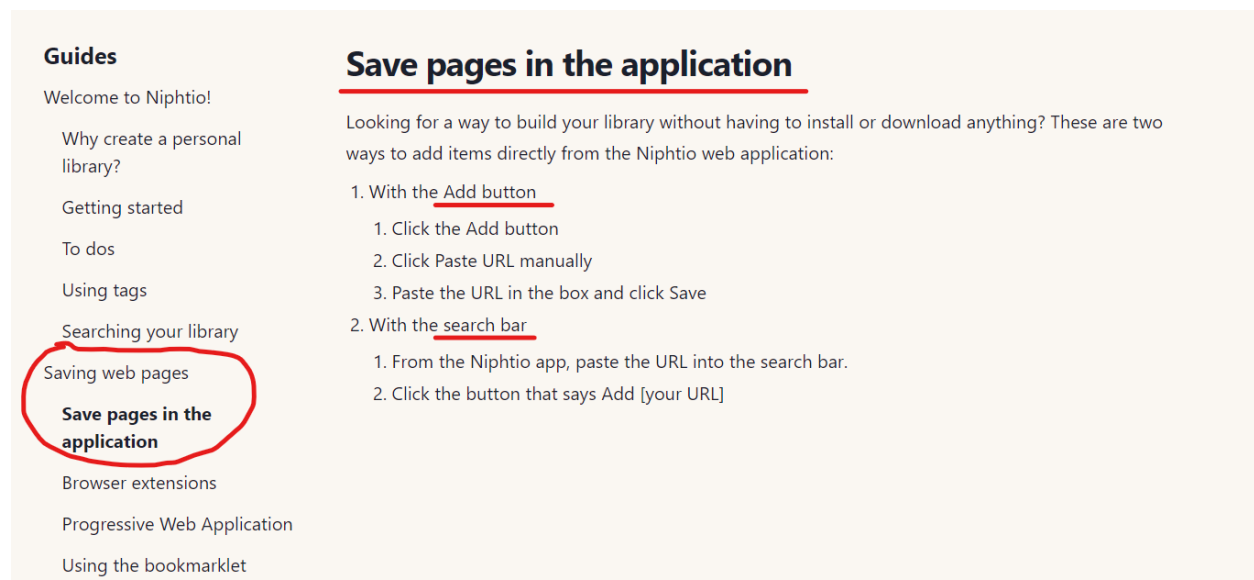

### **Severity**

Low

### **Workaround**

Use of sub-title “Add/Search icons” instead of “Save pages in the application” under the title “Saving web pages” in the Guides list will give readers a better understanding.

### **Attachments**

The screenshot displays the Niphtio web application interface. On the left, a sidebar titled "Guides" lists various topics: "Welcome to Niphtio!", "Why create a personal library?", "Getting started", "To dos", "Using tags", "Searching your library", "Saving web pages", "Save pages in the application", "Browser extensions", "Progressive Web Application", and "Using the bookmarklet". The "Save pages in the application" item is circled in red. The main content area features a section titled "Save pages in the application" with a red underline. Below the title, it explains that there are two ways to add items directly from the Niphtio web application: 1. With the Add button (which includes steps: Click the Add button, Click Paste URL manually, Paste the URL in the box and click Save) and 2. With the search bar (which includes steps: From the Niphtio app, paste the URL into the search bar, Click the button that says Add [your URL]).

### **Additional Information**

It is a non-functional feature of the application and is low in priority. To make the Guide more user-friendly, such terms can be replaced.

**ID002:** Existence of “Add” button instead of “Install” in PWA installation on Android device.

## Description

When following the Guides for ‘Installing the PWA’ on an Android device, found “Add” as the last step instruction instead of “Install”.

## Steps to Reproduce

1. Open Chrome browser.
2. Navigate to nipht.io
3. Tap the ellipses ( ⋮ ) in the top right corner to open the menu and select “Add to Home Screen”.

## Expected Results

“Install” instead of “Add” as an option for the last step instruction ‘Add to Home Screen’.

## Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

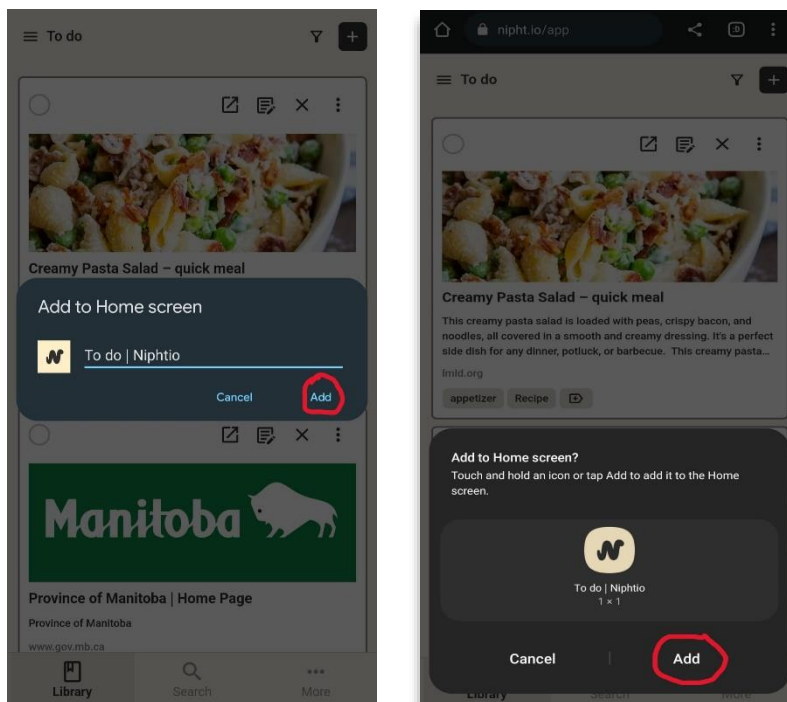

## Severity

Low

## Workaround

A change in the html file.

## Attachments

## Additional Information

It is a non-functional feature of the application. This change will make the app more user friendly and avoid confusion for new app users.

**ID003:** Appearance of text in a paragraph on “Advanced search operators” page

**Description**

The last para on Grouping operators has the letters of the word “recipe” in two separate lines.

**Steps to Reproduce**

- 1. Navigate to <https://www.nipht.io/guides/advanced-search-operators-2023>
- 2. Scroll down the page.
- 3. View the last description on Grouping Operators where the word “recipe” appears.

**Expected Results**

Paragraph nicely formatted with all letters of respective words aligned in same line.

**Environment**

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

**Severity**

Cosmetic

**Workaround**

A change in the html and css files.

**Attachments** (mandatory, some evidence of the bug)

Advanced features  <b>Advanced search operators</b>  Using the multi-tab saver  Using notes	Notes search	note:XX	Find results only based on searching through notes
	To do(s)	is:todo	Find all To Do items, regardless of whether they are complete
	Completed To Do(s)	is:complete	Find all completed To Do items
	Incomplete To Do(s)	is:incomplete	Find all incomplete To Do items
	URL search	url:XX	Find results by searching through URLs
	Site search	site:example.com/foo	Find results where the URL contains the exact match
	Grouping operators	(XX)	Use parentheses to group operators and control the order in which they execute. e.g. (cake   pie) <u>recipe</u>

**Additional Information**

It is a non-functional feature of the application. This improvement in the cosmetic feature will enhance a new user’s usage of the app in a more comfortable way.
