BUG REPORT on Niphtio web application

ID001: Title/Summary

Tags can be added or removed with the default button turned off / disabled in Settings.

Description

It is possible to add / remove tags in Settings-> Saving Default Tags when the default button is turned off that is the plus (+) icon works.

Steps to Reproduce

1. Navigate to https://www.nipht.io/app/settings
2. Scroll down to Default tags and click on the slide button to turn it off
3. Click on the plus icon
4. Select the desired tag from list

Expected Results

The plus icon should not work, and the new default tag should be selected, or pre-selected tag be removed.

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

Severity

Medium

Workaround

When the slide button is turned off, the whole Default tags feature should be disabled.

Attachments

Additional Information

It is a functional feature of the application and needs to be rectified in the next release or next sprint if not possible in this one. The user might have a wrong impression of this app since the feature works even when disabled.

ID002: Title/Summary

Dark Mode feature can be considered as a sub-menu item of Settings

Description

Dark Mode feature can be considered as a sub-menu item of Settings instead of a stand-alone item of "My Account" nav menu bar item.

Steps to Reproduce

1. Navigate to https://www.nipht.io/app/settings
2. Click on nav bar item "My account"

Expected Results

My account->Settings->Account management, Saving, Screen Background - Dark Mode

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

Severity

Cosmetic

Workaround

A change in the html and css files. Including a sub-title "Dark Mode" under Settings

Attachments

Additional Information

It is a non-functional feature of the application. It still can be rectified in the next release or next sprint if not possible in this one. This change will make the app more user friendly.

ID003: Title/Summary

Non-user-friendly assorted top-down Guide List

Description

The Help Guide list is not arranged in a user-friendly way i.e. the list is not arranged in a way that the reader can start reading from the top.

Steps to Reproduce

1. Navigate to https://www.nipht.io/guides/check-off-to-do-items-sept-2022

Expected Results

User friendly list such as Welcome to Niphtio!-> Getting started-> Saving web pages->Searching your library->Using the bookmarklet->Progressive Web Application-> Using tags->To dos

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

Severity

Cosmetic

Workaround

The Guide list items arranged in the following order: Welcome to Niphtio!-> Getting started-> Saving web pages->Searching your library->Using the bookmarklet->Progressive Web Application-> Using tags->To dos. Some changes in html file needed.

Attachments (mandatory, some evidence of the bug)

Additional Information

It is a non-functional feature of the application. When users start reading the Guide, they would prefer to start reading by knowing the app, Niphtio, how to create an account, how to use the app by saving web pages, searching them, using tags on them, and so on. This improvement in the feature will enhance the users' usage of the app in a more comfortable way.

ID004: Title/Summary

Link "log in page" in Getting Started page directs to a wrong page

Description

The link "log in page" in Getting Started page does not direct to login page but instead to - To do page - https://www.nipht.io/app

Steps to Reproduce

1. Navigate to https://www.nipht.io/guides/getting-started-feb-2023
2. Scroll down the page to "Logging into your Niphtio account"
3. Click the link "log in page"

Expected Results

Log in page is displayed

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

Severity

Medium

Workaround

The existing link https://www.nipht.io/app in html needs to be changed to Log in page link https://www.nipht.io/login. Editing in html would solve the issue.

Attachments

Additional Information

It is a functional feature of the application. When users will not be able to log in by using this existing link, this will hamper the image of the company on the quality of the app.

ID005: Title/Summary

Links "Show bookmarks bar in Firefox" and "Show favorites bar in Safari" used in Using the bookmarklet guide list item are directing to the wrong page.

Description

The above-mentioned links used in 'Using the bookmarklet' guide list item is directing to the same page (https://support.google.com/chrome/answer/188842?hl=en-GB&co=GENIE.Platform=Desktop) that is used for "Show bookmarks bar in Chrome"

Steps to Reproduce

1. Navigate to https://www.nipht.io/guides/how-to-use-the-bookmarklet
2. Scroll down the page to "I don't see my bookmarks bar"
3. Click on the links for "Show bookmarks bar in Firefox"
4. Click on the links for "Show favorites bar in Safari"

Expected Results

Relevant pages should be displayed for each of the browsers.

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser

Severity

Medium

Workaround

The links should be edited in the html file of the webpage.

Attachments

Additional Information

It is a functional feature of the application. When users use bookmarklet in their Firefox and Safari browsers, they might want to check the guide using their respective links. Links taking to wrong page like for a different browser- Chrome- might provide a wrong impression to the user especially for loyal users of Firefox and/or Safari.

ID006: Title/Summary

Navigation bar links of menu items such as "Niphtio" and "Log in" direct to error / empty page

Description

Sometimes the links in the nav bar of Help Guides page do not take to their respective pages. "Niphtio" takes to a page with error message and "Log in" takes to an empty page. Probably an application error: a client-side exception has occurred.

Steps to Reproduce

1. Navigate to https://www.nipht.io/guides/check-off-to-do-items-sept-2022
2. Click on "Niphtio" nav bar logo link
3. Check the page the link takes to
4. Click on "Log in" nav bar menu item link
5. Check the empty page the link displays

Expected Results

The app's home page should always be displayed when "Niphtio" clicked and Log in page displayed when "Log in" clicked.

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser
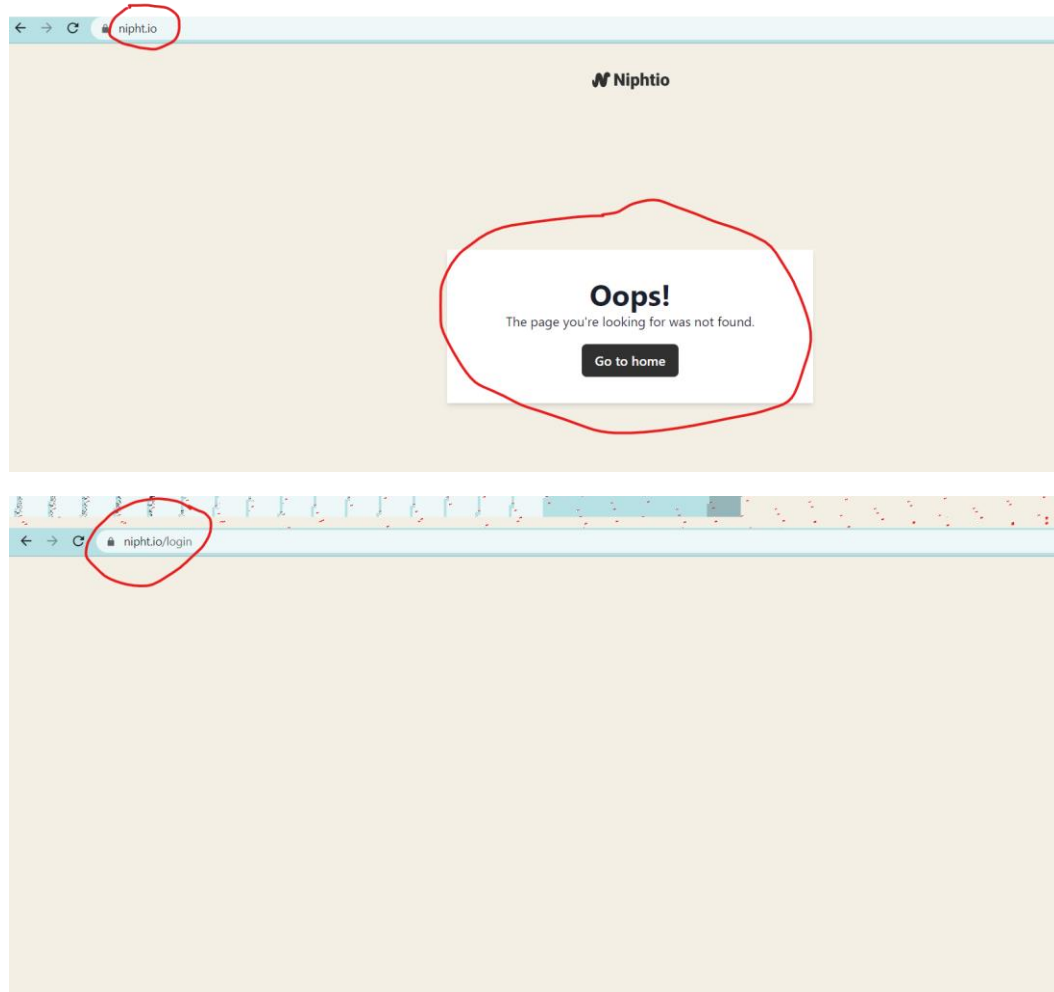

Severity

Major

Workaround

A change in the html files for these pages is required. The app's home page link https://www.nipht.io/ should be used for "Niphtio" link and https://www.nipht.io/login for "Log in" link

Attachments

Additional Information

It is a functional feature of the application and needs to be rectified in the next release or next sprint if not possible in this one. Pages with good CSS create a great user experience and make the front end of the website shine. So, good web pages give a good user impression.

ID007: Title/Summary

Links to items (Using tags/Saving web pages/To dos) in library display pages with improper page layouts with incorrect CSS

Description

In the All items list, already exists 3 items (Using tags/Saving web pages/To dos). Links to these items display pages with improper page layouts that include header usage, line spacing, paragraph spacing and many more.

Steps to Reproduce

6. Navigate to https://www.nipht.io/app/collection/-3
7. Click on "Using tags", "Saving web pages" and "To dos"

Expected Results

A proper formatted page layout for each or the links direct to already formatted page layouts such as https://www.nipht.io/guides/stay-organized-with-tags-sept-2022, https://www.nipht.io/guides/save-web-pages-from-anywhere-sept-2022, https://www.nipht.io/guides/check-off-to-do-items-sept-2022

Environment

Windows 11, version 22H2, HP PC- 16GB RAM intel core i7 processor, Chrome browser
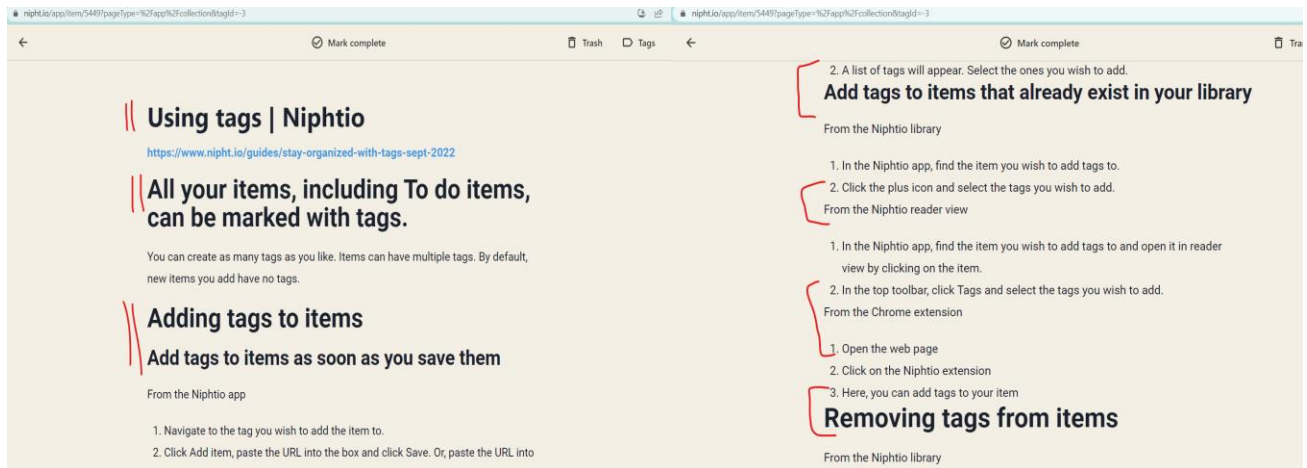

Severity

Low

Workaround

A change in the css files or change in the links used in the html files

Attachments

Additional Information

It is a non-functional feature of the application. But still a bug and needs to be rectified in the next release or next sprint if not possible in this one. Pages with good CSS create a great user experience and make the front end of the website shine. So, good web pages give a good user impression.
